Re Item V.

Ŋ

1 The following documents are referred to in this communication:

D1: WO 97/05018 A (GLAXO GROUP LTD; BONNEY STANLEY GEORGE (GB); WILSON ALAN ANTHONY (GB)) 13 February 1997 (1997-02-13)

D2: US 3 306 323 A (THEODORE ARONSON) 28 February 1967 (1967-02-28)

D3: EP 1 055 601 A (RICOH KK) 29 November 2000 (2000-11-29)

2 INDEPENDENT CLAIM 1

2.1 The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT. Document D1 discloses (the references in parenthesis applying to this document): a method of filling with powder (15) a container (12) having an open end, the method including: positioning an outlet (14) of a hopper (11) containing powder (15) above the open end of the container (12); mechanically agitating the hopper so as to cause powder to be transferred from the hopper to the container; and mechanically agitating the container; wherein the steps of mechanically agitating are conducted by at least a predetermined amount sufficient to ensure that the container is filled with powder at a predetermined density.

Thus D1 shows all the features of claim 1. Claim 1 defines broadly the agitating steps and gives results to be achieved rather than expressly indicate how the predetermined density is controlled.

- 2.2 Similarly also Document D2 discloses (see passages cited in the International Search Report) all the features of claim 1.
- 2.3 Similarly also Document D3 discloses (see passages cited in the International Search Report) all the features of claim 1.
- 3 INDEPENDENT CLAIM 20

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

3.1 The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 20 is not new in the sense of Article 33(2) PCT.

Document D1 discloses (the references in parenthesis applying to this document): a method of simultaneously filling with powder (15) a plurality of containers (12) having respective open ends, the method including: providing a hopper (11) having a plurality of outlets positioning the plurality of outlets above corresponding open ends of the containers (12).

The simultaneous conducting of this method with the method of claim 1 it is not understood as a limitation of the claim

4 INDEPENDENT CLAIM 21

4.1 The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 21 is not new in the sense of Article 33(2) PCT.

Document D2 discloses (the references in parenthesis applying to this document): an apparatus (20) for filling with powder a container (34) having an open end, the apparatus including: a support (31) for the container (34); a hopper (42) having an outlet and being selectively moveable relative to the support to position the outlet above the open end of a supported container (34); a dispenser (46) for mechanically agitating the hopper (42) and container (34) so as to cause powder to be transferred from the hopper to the container; and a controller (53a,53b,56,57,62) for operating the dispenser by at least a predetermined amount sufficient to ensure that powder in the container reaches a predetermined density.

Thus D2 shows all the features of claim 21.

DEPENDENT CLAIMS 2-5, 7, 8 10, 13, 14, 16-19
Dependent claims 2-5, 7, 8, 10, 13, 14, 16-19 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty and/or inventive step (Article 33(2) and (3) PCT).
